Some of the major programs which use our products:

**Aircraft – Commercial**
- Airbus A319 – A380
- AC311
- An-148-100B
- An-158
- ARJ21
- Boeing 737 through 787
- Bombardier Canadian Regional Jet – CRJ
- Bombardier Q Series
- C919 - China
- MA 6000 - China
- Tu-204SM

**Aircraft – Military/Defense**
- AH-64 Apache Target Acquisition Display – TADS
- B-2 Stealth Bomber
- B-52 Stratofortress
- E-2C Hawkeye
- Eurofighter Defensive Aids Sub System – DASS
- Eurofighter European Collaborative Radar – ECR90
- Eurofighter fuel measuring system
- Eurofighter Oil Debris Monitoring – ODM
- Eurofighter On-Board Oxygen Generation System – OBOGS
- Eurofighter Stick Sensor and Interface Control Assembly – SSICA
- Eurofighter Transmitter Receiver
- F/A-18 Hornet
- F-15 Eagle
- F-16 Fighting Falcon
- F-16 Fighting Falcon Integrated Multi-Platform Launch Controller – IMPLC
- F-18 Integrated Defensive Electronic Countermeasures – IDECM
- F-2 Attack Fighter
- F-22 Raptor
- F-35 Joint Strike Fighter
- GRIPEN
- Dhruv Advanced Light Helicopter – ALH
- Kawasaki OH-1 Helicopter
- Kiowa OH-58 Helicopter
- Jaguar Helicopter
- Joint Strike Fighter – JSF
- K8 Trainer
- Light Combat Aircraft
- LCH
- LUH
- Lynx Helicopters
- NH90 Helicopters
- Rafale Fighter
- Tigre Helicopter
- UH60JA Helicopter
- V-22 Osprey

**Commercial/Industrial**
- Gravimeter GT-1A
- Oil and gas pipeline monitoring
- Oil platform system controls
- Oil Rig down hole instrumentation

**Electronic Warfare**
- AEGIS Radar DDG-51 Arleigh Burke
- AN/AAR-58 Common Missile Warning – CMW
- AN/ARC-164 Radio
- Directional Infrared Counter Measure – DIRCM
- Erieye
- Girafe Agile Multi Beam Radar
- Identification Friend-or-Foe – IFF
- Light Airborne Multipurpose System Mulitmode Radar – LAMPS
- Multifunctional Information Distribution System – MIDS
- Seer Radar Warning Receiver – RWR
- Ocean Master
- Navy Multiband Terminal – NMT

**Land Systems**
- K1 Self Propelled Howitzer, Serbia
- K9 Self Propelled Howitzer, S Korea
- Light Armored Vehicle – LAV, Stryker
- Leclerc Tank
- Leopard Tank
- Veicolo blindato medio [medium armored vehicle]
- Challenger Tank
- M1A1 Abrams Tank
- Multiple Launch Rocket System – MLRS
- Pz 2000 Self Propelled Howitzer, Germany

**Missiles**
- Patriot Advanced Medium-Range, Air-to-Air Missile – AMRAAM
- Anti-Submarine ROCket – ASROC
- Bamse Automatic Command-to-Line-Of-Sight – ACLOS
- Evolved Seasparrow Missile – ESSM
- InfraRed Imaging System, Tail/Thrust Vector controlled – IRIS-T
- Joint Air-to-Surface Standoff Missile – JASSM
- Joint Strike Missile – JSM
- Mobile Surface-to-Air-Missile – MSAM
- Nag - India
- Patriot Advanced Capability III – PAC
- Standard Missile II, III and 6
- Taurus
- Tien Chien-II – TC
- Terminal High Altitude Area Defense – THAAD
- Tomahawk
- Trident Class Fleet Ballistic Missile Submarine
- Vertical Launch Antisubmarine – VLA

**Unmanned Aerial Vehicle**
- Airborne Low Frequency Sonar – ALFS
- RQ-4A Global Hawk
- Hermes UAV
- Predator
- Sperwar
- Tactical Automatic Landing System – TALS
- U-2
- Unmanned Combat Aerial Vehicle X-45 – UCAV
- Unmanned Aerial Vehicle X-47 – UAV
- Watchkeeper

Crane Co.

Founded in 1855, Crane Co. is a diversified manufacturer of highly engineered industrial products with a substantial presence in a number of focused markets, with over 11,000 employees at over 150 locations working together across 26 countries. The Company has four business segments: Aerospace & Electronics, Fluid Handling, Payments & Merchandising Technologies, and Engineered Materials. Crane Co. is traded on the New York Stock Exchange (NYSE: CR). For more information, please visit www.craneco.com.

Power Components & Subsystems

Crane is a provider of high quality, rugged power products with nearly 60 years of experience in power conversion, management, monitoring and energy storage. We offer a full line of off-the-shelf and custom power solutions for the commercial aerospace, defense and space markets for applications in avionics, communications, electronic countermeasures, missiles, radar, navigation, guidance and utility systems. A trusted industry leader in power and advanced packaging solutions, our ELDEC®, Interpoint® and Keltec® brand products meet the requirements for flight and mission critical applications while delivering the efficiency and reliability that our customers demand.

From the Mars Science Lab to commercial aircraft, missiles to fighter aircraft, our range of power products include custom, semi-custom or off-the-shelf products have proven their ability to operate in the most demanding environments. Our quality systems ensure reliable, repeatable, processes and performance.

Modular Power – High Reliability DC-DC Converters and EMI Filters

The Modular Power segment includes Interpoint dc-dc converter and EMI filter modules that have proven performance in extreme environments where high reliability is required and failure is not an option. These modules are ideal for aerospace, military/defense, space, medical and industrial applications. We offer a standard line of high reliability dc-dc power converters fully qualified up to Class K, QML of MIL-PRF-38534.

To meet demanding time and cost targets, choose a product from the standard converters and filters. We offer over 1,000 off-the-shelf high-reliability dc-dc power conversion products. For more information please visit www.craneae.com/interpoint.
Power Solutions

Power Solutions offers ELDEC, Interpoint and Keltec brand power conversion, power distribution and battery systems for the commercial aerospace, defense and space for use in avionics, ATA Chapter 24 Power Systems, communications, electronic countermeasures, missiles, radar, navigation, guidance and utility systems. Our power products, which are well known for high performance and high reliability, have proven performance in military/defense, aerospace, space and industrial applications. From modular power supplies to custom-designed power sub-systems, we can deliver what you need. Our range of power offerings include custom, semi-custom or off-the-shelf products. Our quality systems ensure reliable, repeatable, processes and performance.

DC-DC Converters and EMI Filters

Interpoint dc-dc converter and EMI filter modules have proven performance in extreme environments where high reliability is required and failure is not an option. They are ideal for aerospace, military/defense, space, medical and industrial applications.

We offer a standard line of high reliability dc-dc power converters fully qualified up to Class H QML, of MIL-PRF-38534. To meet demanding time and cost targets, choose a product from the standard converters and filters. Over 1,000 off-the-shelf high-reliability dc-dc power conversion products are available. For more information please visit www.craneae.com/interpoint.
Interpoint DC-DC Converters and EMI Filter Overview

Interpoint Product Overview

**High Temperature Operation**
High temperature ceramic capacitors and all-metal thermally-conductive cases provide full power over the operating range of -55 to +125°C (most products).

**Constant Frequency Design**
Our proprietary pulse-width-modulated forward converter design produces constant frequency operation and excellent transient response.

**Full Hermeticity**
Hermetically sealed cases provide optimum protection for all components ensuring high reliability operation in harsh environments.

**Innovative Solutions**
With over forty years of experience, we are your first source for power conversion products for high reliability applications. We have provided innovative power solutions for aerospace, military/defense, space and industrial applications where size, weight and reliability are critical to program success. Our high reliability products are classified as EAR99, no license required for export. Our EAR99 products have been used in commercial satellites.

**Modular Power Conversion**
Choose from over 1,000 power conversion products. We were one of the first companies to qualify to MIL-STD-1772 (1987), which was DLA's microcircuit standard in 1987. Our first standard microcircuit drawing (SMD) for a Class H hybrid was issued in 1992, and our first Class K hybrid SMD was issued in 1997. In 1997, we were one of the first companies to certify manufacturing to Class K.

**Technical Support**
Applications Engineers are available to provide technical support by phone or email. Call +1 425-882-3100, option 7 or email powerapps@crane-eg.com. For the fastest response to a voice message or email please include your name, company name, a phone number, the model number and a brief statement of the problem.

**Advanced Performance**
Advanced magnetics and our patented Asymmetrical Power Transfer provides high power density, high efficiency and low height.

**Standard Military Drawings**
For highest reliability, a full range of our products are available as /883 products (Class H, QML). DC-DC Converters are available on Standard Microcircuit Drawings (SMD) and EMI filters are available on DLA Drawings.

**Part Numbering**
Our part numbering indicates the series (family), input voltage, output voltage, number of outputs, package configuration and screening code.

```
Base Model  MTR  28  12  D  F  /  883
Input Voltage
Output Voltage
(Main and aux. Vout for triple models)
Number of Outputs
(S = single, D = dual, T = triple)
Case/Lead Option
(Standard case has no designator in this position. F=flanged model; U, V, W, Y and Z refer to various options on select products. See individual products for more information.)
Screening
(Standard screening has no designator in this position.)
```

**Note:**
1. The filters listed are suggested filters. Any of our high reliability filters can be used with our converters up to the filter’s rated maximum current.
MOR SERIES™ CONVERTER—120 WATT
OUR MOST VERSATILE CONVERTER

- Parallel operation with current share, up to 5 units (540 watts)
- Output flexibility, trim of 60% to 110%
- Operating temperature -55° to +125°C
- Input voltage 16 to 40 volts
- Transient protection 50 volts for 120 ms
- Fully isolated, magnetic feedback
- Fixed high frequency switching
- Remote sense
- Inhibit function
- Sync In and Sync Out
- Indefinite short circuit protection
- High power density with up to 87% typical efficiency

With up to 120 watts of output power, the MOR Series™ of dc-dc converters operates from a standard 28 volt bus with input voltage of 16 to 40 volts. Full operation over -55° to +125°C makes the MOR Series an ideal choice for aerospace, military, space and other high reliability applications. In compliance with MIL-STD-704D, the converters will withstand transients of up to 50 volts for up to 120 milliseconds. Use our FME28-461 EMI filter to pass MIL-STD-461C, CE03 requirements. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the MOR datasheet at www.interpoint.com/MOR.

Interpoint High Reliability DC-DC Converters

MHP270 SERIES™ CONVERTERS—65 WATT

- Parallel operation with current share, up to 5 units (276 watts)
- Operating range -55° to +100°C
- Transient protection 450 volts for 50 ms

The high power density MHP270 Series uses current mode voltage control to allow parallel current sharing for increased power. See Table 3. For the most current specifications refer to the MHP270 datasheet at www.interpoint.com/MHP.

MFL SERIES™ CONVERTERS—65 WATT

- Parallel operation with current share, up to 3 units
- -55° to +125°C operation
- 50 volts for 120 ms transient protection
- Fully isolated, magnetic feedback
- Remote sense or output trim on single output models

The MFL Series converters offer up to 65 watts output power in a sealed metal case. Standard features include undervoltage lockout, remote sense and sync. Available with Standard, ES or 883 (Class H-QML) screening. See Screening Table 1 and Table 2. For the most current specifications refer to the MFL datasheet at www.interpoint.com/MFL.

FMTR SERIES™ CONVERTERS—30 WATT

- EMI input filter, up to 50 dB attenuation
- High frequency output filter
- -55° to +125°C operation
- 17 to 40 volts input
- Up to 50 volts for 50 ms transient protection
- Fully isolated, magnetic feedback
- Trim and remote sense on singles
- Inhibit and synchronization functions

The FMTR Series™ of dc-dc converters has a 2.7 amp EMI input filter that meets MIL-STD-461C, CE03 and allows filtering of additional converters through the filter output pins up to the current limit of the filter. FMTR converters are packaged in hermetically sealed metal cases, making them ideal for use in aerospace, military and other high reliability applications. Available with Standard or ES Quality Assurance screening. See Table 3. For the most current specifications refer to the FMTR datasheet at www.interpoint.com/M02.

MFX SERIES™ CONVERTERS—50 WATT

SINGLE

- Up to 90% typical efficiency
- ±10% trimmable outputs
- Input voltage range 16 to 50 volts
- Transient protection up to 80 volts
- Operating temperature -55° to +125°C
- Fully isolated, magnetic feedback
- Inhibit function
- Indefinite short circuit and overload protection
- Undervoltage lockout

The high efficiency MFX Series converters are in a hermetically sealed package. Also available in a flanged package. Features for the isolated, regulated units include inhibit, undervoltage lockout and voltage trim. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the MFX datasheet at www.interpoint.com/MFX.

• Fully isolated, magnetic feedback
• Inhibit function, synchronization function
• Indefinite short circuit protection
• Undervoltage lockout
• Up to 33 W/in³, up to 85% typical efficiency

The MWR Series of high frequency dc-dc converters offers a wide input voltage range of 14 to 50 volts and up to 35 watts of output power. The units are capable of withstanding short term transients up to 80 volts for one second. The package is a hermetically sealed, welded metal case. Flanged and non-flanged models are available. See Table 1 and Table 2. For the most current specifications refer to the MWR datasheet at www.interpoint.com/MWR.

1. Up to 70% of the total auxiliary current/power is available from either auxiliary output, providing the opposite output is carrying at least 30% of the total auxiliary power in use. The specification shown is the maximum total current/power.
MTR (50) SERIES™
CONVERTERS—30 WATT
SINGLE OR DUAL

• Input voltage range 16 to 50 volts
• Transient protection up to 80 V per MIL-STD-704A
• Operating temperature -55° to +125°C
• Fully isolated, magnetic feedback
• Fixed high frequency switching
• Indefinite short circuit and overload protection
• Up to 84% typical efficiency

The high frequency MTR Series converters are in a hermetically sealed package. Also available in a flanged package. Features for the isolated, regulated units include inhibit, remote sense, voltage trim and synchronization. The cover marking for the MTR 50 has “MTR (50) DC-DC CONVERTER” below the model number. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the MTR 50 datasheet at www.interpoint.com/MTR50.

For information on ordering an MTR Series MTR 50, please contact your sale representative. You can find contact information at www.interpoint.com/contact.

MFK SERIES™ CONVERTERS—25 WATT

- 16 to 50 volt input
- Up to 87% typical efficiency, 42 W/in³
- 65 volts for up to 1 second transient protection
- Undervoltage lockout
- -55°C to +125°C operation
- Fully isolated
- Magnetic feedback
- Fixed frequency, 500 kHz typical
- Inhibit and sync function
- Output short circuit protection

The MFK Series offers a new standard of performance for small size and high power density. At just 0.360 inch high and a total footprint of 1.7 in², this low profile package offers a total power density of up to 42 watts per cubic inch. The wide input voltage range is further supplemented by an ability to withstand up to a 65 volt transient for up to one second. Typical output ripple is as low as 40 mV at room. The MFK converters current mode control system provides excellent dynamic response and noise rejection. Audio rejection is typically 50 dB. Output voltage response for a 50% to 100% step load transient is as low as 4% with a 400 µs recovery time. Input ripple current is typically 35 mA p-p with output ripple voltage 30 mV p-p at 20 MHz BW. Available with Standard or ES screening. See Table 1 and Table 3. For the most current specifications refer to the MFK datasheet at www.interpoint.com/MFK.

Maximum dimensions

(Refer to the full datasheet for MTR Dual non-883 dimensions)
MHF+ SERIES™ CONVERTERS—15 WATT

SINGLE, DUAL OR TRIPLE

- Hermetically sealed case
  0.33 inches (8.38 mm) high
- Operating temperature -55° to +125°C
- Input voltage 16 to 40 volts (16 to 48 volts triple)
- Transient protection
  - Single and dual: 50 volts for 50 ms
  - Triple: 80 volts for 120 ms
- Fully isolated
- Fixed high frequency switching
- Inhibit and synchronization functions
- Indefinite short circuit protection
- Up to 84% typical efficiency

MHF+ Series of converters provide up to 15 watts output power over the full -55 to +125°C temperature range. The converters are packaged in hermetically sealed metal cases using only 1.7 square inches of board area and are 0.330” high. Up to 84% typical efficiency. Single, dual and triple outputs available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the MHF+ datasheet at www.interpoint.com/MHF.

1. Up to 90% of the total current/power (80% for the MHF+2805D) is available from either dual output, providing the opposite output is carrying at least 10% of the power in use (20% for the MHF+2805D). The specification shown is the maximum total current/power.

2. The sum of the auxiliary output power may not exceed 7.5 watts. Up to 5 watts (approximately 66%) of the total auxiliary power is available from either output provided the opposite auxiliary is simultaneously carrying 2.5 watts (approximately 33%) of the total auxiliary power.

[Diagram of converter dimensions]
Interpoint High Reliability DC-DC Converters

**MSA SERIES™ CONVERTERS—5 WATT**

- Small size of 1.16 in² (7.5 cm²)
- Operating temperature -55° to +125°C
- Input voltage range 16 to 40 volts
- Transient protection 50 volts for 50 ms
- Fully isolated
- Fixed high frequency switching
- Inhibit function
- Indefinite short circuit protection
- Up to 74% typical efficiency

The MSA Series converters offer up to 5 watts output power in our low profile case—just 0.270 inches high. These regulated, isolated converters offer 500 kHz switching and full power operation over the full temperature range of -55° to +125°C. Audio rejection is up to 50 dB. No external capacitors are required. Metal hermetically sealed cases. Single and dual outputs. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the MSA datasheet at www.interpoint.com/MSA.

**MGA SERIES™ CONVERTERS—5 WATT**

- Surface mount package, 1.23 in² (7.9 cm²)
- Operating temperature -55° to +125°C
- Input voltage range 16 to 40 volts
- Transient protection 50 volts for 50 ms
- Fully isolated
- Fixed high frequency switching
- Inhibit function
- Indefinite short circuit protection
- Up to 74% typical efficiency

The MGA Series converters offer up to 5 watts output power in our lowest profile case—just 0.250 inches high. These regulated, isolated converters offer 500 kHz switching and full power operation over the full temperature range of -55° to +125°C. Audio rejection is up to 50 dB. No external capacitors are required. Metal sealed cases. Single and dual outputs. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the MGA datasheet at www.interpoint.com/MGA.

MCH SERIES™ CONVERTERS—1.5 WATT

- Small footprint of 0.79 in² (5.1 cm²)
- Operating temperature -55°C to +125°C
- Input voltage range 12 to 50 volts
- Transient protection 80 volts for up to 120 ms
- Up to 70 volts for the 15 volt single and dual models
- Fully isolated, magnetic feedback
- Fixed frequency switching
- Inhibit function
- Indefinite short circuit protection
- Undervoltage lockout
- Up to 79% typical efficiency

The MCH offers 1.5 watts in 0.8 square inches. The parts offer full power operation from 12 to 50 volts input over the full -55°C to +125°C temperature range. Single and dual outputs. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the MCH datasheet at www.interpoint.com/MCH.

**Notes:**
1. FM-704A has a transient suppression feature and cannot be used above a 40 volt dc input.
Interpoint High Reliability EMI Filters

FMCE-1528™ EMI FILTER—15 AMP

- Attenuation to 70 dB at 500 kHz, typical
- Filter multiple converters up to the rated current
- Operating temperature -55° to +125°C
- Transient rating -0.5 to 80 volts for 1 second
- Up to 15 amps throughput current over the full input voltage range of -0.5 to 50 volts
- Compliant to
  - MIL-STD-461C, CE03
  - MIL-STD-461D, E and F CE102
  - MIL-STD-461C CS01
  - MIL-STD-461D, E and F CS101

The FMCE-1528 is a drop-in replacement for the FME28-461. One filter can be used with multiple converters up to the rated output current of the filter. Operating temperature is -55 to +125°C. FMCE-1528 filters are available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the FMCE-1528 datasheet at www.interpoint.com/F09.

FMCE-0828™ EMI FILTERS—8 AMP

- Attenuation 60 dB at 500 kHz, typical
- Operating temperature -55° to +125°C
- Nominal 28 volt input, -0.5 to 50 volts operation
- Transient rating -0.5 to 80 volts for 1 second
- Up to 8 amps throughput current over the full input voltage range of -0.5 to 50 volts
- Compliant to
  - MIL-STD-461C CE03
  - MIL-STD-461D, E and F CE102
  - MIL-STD-461C CS01
  - MIL-STD-461D, E and F CS101

FMCE-0828 is a drop in replacement for the FMD28-461 EMI filter and has a higher current rating. FMCE-0828 filters minimize electromagnetic interference (EMI) for the MFL, MOR, MTR, MHV and MHF+ Series of converters. One filter can be used with multiple converters up to the rated output current of the filter. FMCE-0828 filters are available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the FMCE-0828 datasheet at www.interpoint.com/F10.
Interpoint High Reliability EMI Filters

FMCE-0528™ EMI Filter—5 Amps

- Attenuation to 60 dB at 500 kHz, typical
- Operating temperature -55°C to +125°C
- Nominal 28 volt input, -0.5 to 50 volts operation with or without transorb
- Transient rating -0.5 to 80 volts for 1 second
- Up to 5 amps throughput current over the full input voltage range -0.5 to 50 volts
- Compliant to:
  - MIL-STD-461C CE03
  - MIL-STD-461D, E and F CE102
  - MIL-STD-461C CS01
  - MIL-STD-461D, E, and F CS101

The FMCE-0528™ EMI filter is a drop-in replacement for the FMC-461 and has a higher current rating. The FMCE-0528-TR filter has a fast-reacting (1 pico second) transient suppressor, which begins clamping the input voltage at approximately 47 volts to protect the dc-dc converter from damage. The FMCE-0528 does not have a transorb. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the FMCE-0528 datasheet at www.interpoint.com/F11.

FMCE-0328™ EMI Filter—3 Amps

- Attenuation to 60 dB at 500 kHz, typical
- Operating temperature -55°C to +125°C
- Nominal 28 volt input, -0.5 to 50 volts operation
- Transient rating -0.5 to 80 volts for 1 second
- Up to 3 amps throughput current over the full input voltage range -0.5 to 50 volts
- Compliant to:
  - MIL-STD-461C CE03
  - MIL-STD-461D, E and F CE102
  - MIL-STD-461C CS01
  - MIL-STD-461D, E, and F CS101

The FMCE-0328™ EMI filter is a drop-in replacement for the FMH-461 and has a higher current rating. At 50 volts input (high line), the filter provides 150 watts of throughput power. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the FMCE-0328 datasheet at www.interpoint.com/F12.
The FME270-461 filters will bring Interpoint high frequency power supplies into compliance with MIL-STD-461's CE03 limits for reflected ripple current. FME270 models are available in a flanged, side-leded package (Case U). Operating temperature is -55 to +125°C. FME270-461 filters are available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the MHP270 datasheet at www.interpoint.com/F05.
Interpoint High Reliability EMI Filters

FMSA SERIES™ EMI FILTER—0.8 AMPS

- Small footprint, 0.79 in² (5.1 cm²)
- Attenuation 55 dB at 500 kHz
- Operating temperature -55° to +125°C
- Nominal 28 volt input, 0 to 50 volts operation
- Up to 0.8 amp throughput current
- Compatible with MIL-STD-704 A-E 28 volt power bus
- Compliant to MIL-STD-461C CE-03

The FMSA has been designed as a companion for our MSA and MCH converters. It can be used with multiple converters up to the rated current. The filter weighs 10.3 grams and is only 0.27 inches high. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the FMSA datasheet at www.interpoint.com/FØ7.

FMGA SERIES™ EMI FILTER—0.8 AMPS

- Surface mount package, 0.89 in² (5.7 cm²)
- Attenuation 55 dB at 500 kHz
- Operating temperature -55° to +125°C
- Nominal 28 volt input, 0 to 50 volts operation
- Up to 0.8 amps throughput current
- Compatible with MIL-STD-704 A-E 28 volt power bus
- Compliant to MIL-STD-461C CE-03

Our surface mount FMGA-461™ EMI filter has been designed to work with our surface mount MGA and MGH Series dc-dc converters. Multiple MGA or MGH Series converters can be operated from a single FMGA filter provided the total power/current line current does not exceed the filter’s maximum rating. The FMGA filter will reduce the converter’s power line reflected ripple current to within the limit of MIL-STD-461C, Method CE03. The filter uses only ceramic capacitors for reliable high-temperature operation.

It weighs 10.3 grams and is only 0.25 inches high. Available with Standard, ES or 883 (Class H-QML), Quality Assurance screening. See Table 1 and Table 2. For the most current specifications refer to the FMH datasheet at www.interpoint.com/FØ8.
Table is for reference only. See individual Series’ datasheets for specific screening.

Test methods are referenced to MIL-STD-883 as determined by MIL-PRF-38534.

Notes
1. Standard and ES are non-QML products and may not meet all of the requirements of MIL-PRF-38534.
2. All processes are QML qualified and performed by certified operators.
3. Not required by DLA but performed to assure product quality.
4. Burn-in temperature designed to bring the case temperature to +125°C minimum. Burn-in is a powered test.

Redmond Operations

Interpoint brand
All space products are built in Redmond
Redmond, Washington, USA
Facility: 81,000 square feet
Founded: 1969

Quality Certifications
• SO 9001:2008/AS9100-B
• Defense Logistics Agency’s (DLA, formerly DSCC) MIL-PRF-38534 Qualified Manufacturers List (QML)
• NASA’s Preferred Parts List (PPL)
• Products qualified to Class H and Class K, QML

Our Redmond facility was one of the first manufacturers to certify to class K, QML, per MIL-PRF-38534 and to qualify a Class K, QML, hybrid dc-dc converter to a Standard Microcircuit Drawing. This followed in the tradition of being one of the first manufacturers to certify to Class H per MIL-STD-1772.

Our dc-dc converters and EMI filters are well known for their reliable performance in military/aerospace applications and in the far reaches of space.

Quality Systems and Certifications

Quality Systems Overview—Redmond and Kaohsiung

- The quality management system of Crane Electronics, Inc., Redmond and Kaohsiung, has been certified to ISO 9001 and AS9100C, file numbers 1623564 and 1623567. The quality management system of Crane Electronics, Inc., in Saint Gratien, France and Yately, UK has been certified to ISO 9001, file numbers 1623563 and 1623562. The quality management system is certified by QMI-SAI Global. Visit www.qmi-saiglobal.com for more information. Our certification is listed at www.qmi-saiglobal.com/qmi_companies. We are listed under Crane Electronics, Inc. (Redmond and Kaohsiung) and Interpoint (France and UK).

- Our Redmond and Kaohsiung facilities are on the Defense Logistics Agency’s (DLA) Qualified Manufacturers List (QML) of hybrid microcircuits with products compliant up to Class H (Redmond and Kaohsiung) and Class K (Redmond) of MIL-PRF-38534. Our manufacturing facilities are audited by a US government organization with customer participation.

- Standard Microcircuit Drawings (SMD) of our dc-dc converters are available to Class H and K of MIL-PRF-38534. DLA Drawing EMI filters are available to Class H and K of MIL-PRF-38534. The government documents may be viewed at http://www.landandmaritime.dla.mil/programs/smcr/

- Components and materials used in product assembly are purchased against published revision controlled source control drawings (SCD). Characteristics and allowed suppliers are controlled by specific SCD. A system is in place to review components and materials prior to stocking. Instruments such as the X-ray fluorescence (XRF) are used to ensure that supplier certifications accurately describe the material. Our high reliability QML products comply with MIL-PRF-38534 specifications, which do not allow the use of pure tin. Our other products may have pure tin. Refer to our “Lead and Other RoHS Materials” letter for more information. www.interpoint.com/011.

- Documented revision controlled procedures and work instructions are in use for all operations that affect quality.

- Radiation hardness assurance (RHA) levels available referenced to MIL-PRF-38534. Our Redmond facility has a DLA approved RHA plan for Interpoint power products. Our SMD products with RHA “P,” “L,” “R” and “H” level meet DLA RHA requirements.

- Travelers are used to sequence and control operations at in-process, final and special inspection situations.

- Quality documents are specifically identified and retained as specified in our document control procedure. The standard retention period for critical documents is 15 years.

- Quality manual QA-040 (www.interpoint.com/012) is the controlling document for the quality system.

- Personnel performing quality functions are given the responsibility, authority and organizational freedom to identify and evaluate quality concerns as well as to initiate corrective action.

- Contracts are reviewed to identify and make timely provisions for special or unusual circumstances.

- As a minimum, self audits of the quality system are completed annually.
Quality Systems and Certifications

Certifications, Qualifications and Standards—Redmond and Kaohsiung

- ANSI/ESD S20.20—Electrostatic Discharge Control Program. We use a multi-level ESD damage prevention approach including operator training, continuously monitoring wrist grounding-straps, static dissipative smocks for personnel, static dissipative work surfaces and floors, air ionizers at work stations and faraday cages for parts movement.
- ANSI/IPC-A-600—Acceptability of Printed Boards
- ANSI-Z540—Calibration Laboratories and Measuring and Test Equipment—General Requirements
- ASQC-Z1.4—Procedures, Sampling and Tables for Inspection by Attributes
- ISO 14644—Cleanrooms and Controlled Environments. Particle count monitoring, laminar flow benches and contamination preventing smocks for personnel all contribute to maintaining the required levels of cleanliness.
- MIL-STD-883—Test Method Standard for Microcircuits
- MIL-PRF-38534—Hybrid Microcircuits, General Specifications for
- Quality Certification—Employees who work with products are individually certified in the required skills. Training and certification are documented and records are maintained. Inspectors are tested for color vision and visual acuity.
- QML-38534—Qualified Manufacturer’s List of Products Qualified under Performance Specification MIL-PRF-38534 Hybrid Microcircuits, General Requirements for
- Restriction of Hazardous Substances (RoHS), Waste Electrical and Electronic Equipment (WEEE) and Registration, Evaluation, and Authorization of Chemicals (REACH) are addressed in “Lead and Other RoHS Materials” available at www.interpoint.com/011
